## Table of Contents

- Welcome Message from the General Chairs
- Conference Organization
- International Reviewers
- International Program Committee
- Technical Sponsors, Promoters and Supporters
- Keynote Speaker 1 - IEEE: World and Latvia Dimensions, Welcome to IEEE Latvia Section by Andrejs Romanovs
- Keynote Speaker 2 - Computer Evolution over the Next Decade: Fact or Fiction? by Frank Wang
- Keynote Speaker 3 - Approximate Feature Selection in Data-Driven Systems Modelling by Qiang Shen
- Keynote Speaker 4 - Circuit Switching Versus Packet Switching by M. A. Sneps-Sneppe
01-A Intelligent Systems
An Improved Multi-state Particle Swarm Optimization for Discrete Optimization Problems ..........................................................................................................................3
Ismail Ibrahim, Zuwairie Ibrahim, Hamzah Ahmad, and Zulkifli Md. Yusof

A Multi-state Gravitational Search Algorithm for Combinatorial Optimization Problems ..........................................................................................................................9
Ismail Ibrahim, Zuwairie Ibrahim, Hamzah Ahmad, and Zulkifli Md. Yusof

Hypernymy in WordNet, Its Role in WSD, and Its Limitations .........................................................15
Udaya Raj Dhungana and Subarna Shakya

An Innovative Framework for Integrated Space-Ground Monitoring ..................................................20
Galina Merkuryeva, Yuri Merkuryev, Andrejs Romanovs, Boris Sokolov, and Semen Potryasaev

03-C Sensor Nodes, Circuits, Devices, Wireless Sensor Networks
RSS Based Localization Using a New WKNN Approach ........................................................................27
Amin Gholoobi and Stavros Stavrou

Evaluation of a Bicycle-Mounted Ultrasonic Distance Sensor for Monitoring Road Surface Condition ....................................................................................................................31
Yoshiaki Taniguchi, Kodai Nishii, and Hiroyuki Hisamatsu

Knowledge Based Routing Protocols in Wireless Sensor Networks ....................................................35
Aditi Das and Ravi Prakash Gorthi

Augmenting QoS in Outdoor Wireless Sensor Networks through Frequency Optimization ..............................................39
Maneesha Vinodini Rameesh, Parvathy Rajan, and P. Divya

Electromagnetically Coupled Microstrip Patch Antennas for High Frequency Sensing Applications ..........................................................................................................................45
S. Sreenath Kashyap and Vedvyas Dwivedi

06-F Modelling and Performance
Comparison of Different Weight Assignment Strategy in Weighted Cooperative Spectrum Sensing ..........................................................................................................................53
Arpita Jaitawat and Purnendu Karmakar

A Novel Method of Opportunistic Wireless Energy Harvesting in Cognitive Radio Networks ..........................................................................................................................59
Vibha Sharma and Purnendu Karmakar

Chaos Code Division Multiplexing Communication System .......................................................................65
Deniss Kolosovs and Elmars Bekeris
Towards Traditional Simulation Models of Context Using Process Mining ........................................... 70
   Paolo Pileggi, Alejandro Rivero-Rodriguez, and Ossi Nykanen

Optimal Strategy Modelling for Routers Resources Allocation in Self-Similar Traffic Environment ............................................................... 76
   Elans Grabs and Ernests Pettersons

07-G Software Platforms and Middleware
Concept of Client-Server Environment for Agent-Based Modeling and Simulation of Living Systems ................................................................. 83
   Ingars Ribners and Guntis Arnicans

An Initial Homophily Indicator to Reinforce Context-Aware Semantic Computing ........................................................... 89
   Alejandro Rivero-Rodriquez, Paolo Pileggi, and Ossi Nykänen

08-H Tools and Techniques for Design, Deployment, Testing, and Evaluation
GPS Signal Acquisition and Sensitivity Analysis Using Different Algorithms on a Software Receiver ......................................................... 97
   Alban Rakipi, Bexhet Kamo, Shkelzen Cakaj, Algenti Lala, and Ilir Shinko

Asynchronous Runtime Verification of Business Processes ............................................................... 103
   Ivo Oditis and Janis Bicevskis

Protocol for Simulation of Falls in Watersports Activities ............................................................... 109
   Carlos Ferreira, João Madureira, and Inês Sousa

Migration of Relational Database to Document-Oriented Database: Structure Denormalization and Data Transformation ........................................... 113
   Girts Karnitis and Guntis Arnicans

Dynamic User Verification Using Touch Keystroke Based on Medians Vector Proximity ............................................................... 121
   Shatha J. Alghamdi and Lamiaa A. Elrefaei

User Privacy Enhancement in Modern Web Applications ............................................................... 127
   Rajiv Bagai and Kirankumar Chandrashekar

Vectorfaces for Illumination Invariant Human Face Recognition ............................................................... 133
   Suranjan Ganguly, Debotosh Bhattacharjee, and Mita Nasipuri
11-K Image, Speech, and Signal Processing

Key Frame Extraction and Foreground Modelling Using K-Means Clustering .................................................................141
   Azra Nasreen, Kaushik Roy, Kunal Roy, and G. Shobha

Real-Time Reservoir Computing Network-Based Systems for Detection Tasks on Visual Contents ..........................................................................................................................................................146
   Azarakhsh Jalalvand, Glenn Van Wallendael, and Rik Van De Walle

Subimage Cosegmentation in a Single White Blood Cell Image ..............................................................................................152
   Rong Chu, Xiaoqin Zeng, Lixin Han, and Min Wang

Qualitative Spectral Parameter Coding for Speech Signals .....................................................................................................158
   Charu and Sukriti Sharma

Respiratory Wheeze Sound Analysis Using Digital Signal Processing Techniques .........................................................................................................................162
   Radwa Magdy Rady, Ibrahim Mohamed El Akkary, Ahmed Nashaat Haroun, Nader Abd Elmoneum Fasseh, and Mohamed Moustafa Azmy

12-L Energy, Power, Transport, Logistics, Harbour, Shipping, and Marine

Toward Building an IT Disaster Recovery Site for Oil and Gas Companies ..................................................................................169
   R. Al-Shaikh, Z. Al-Hussain, and A. Al-Sharidah

14-N Parallel and Distributed Architectures and Systems

A Customized Dashboard for VM Provisioning Using OpenStack ............................................................................................177
   Prajesh P. Anchalia, Pracheta Gupta, and Jyoti Shetty

Heterogeneous and Hybrid Clustered Topology for Networks-on-Chip ......................................................................................183
   Suchi Johari, Arvind Kumar, and Vivek Kumar Sehgal

Arbitrated IP Core Based Dynamic Task Mapping Algorithm for Networks-on-Chip ......................................................................188
   Arvind Kumar, Suchi Johari, and Vivek Kumar Sehgal

15-O Internet Modelling, Semantic Web, and Ontologies

A Service Selection Workflow for Composition Using Correlation and Route Optimization .................................................................................................................................197
   Chin-Chih Chang and Young-Lin Lo
16-P Mobile Ad Hoc Networks
Studying of the Effectiveness of Shopping through Smart-Phones in Saudi Arabia Society .................................................................205
   Hisham Jameel A. Bardessi and Mohammed Abdel Razek

ANTMANET: A Routing Protocol for Mobile Ad Hoc Networks .................................................................210
   Mabrouka Abuhmida, Kapilan Radhakrishnan, and Ian Wells

17-Q Vehicular Technology and Networks
Analysis of Modified High Speed GSM-R Path Loss Model and Handoff Hysteresis Margin of Viaduct Scenario ..............................................219
   Sabria M. Siour and Mousa M. Mousa

19-S QoS for Data Dissemination, Voice, and Video in Wireless Networks
A Cross-Layer Based Bandwidth and Queue Adaptations for Wireless Multimedia Networks .................................................................227
   Lung-Jen Wang, Cheng-En Wu, and Chiung-Yun Chang

20-T Cooperative Autonomous Systems (UAVs/UGVs)
Control and Obstacle Avoidance of Wheeled Mobile Robot .................................................................235
   Muhammad Farhan Manzoor and Qinghe Wu

Coordination Control of Wheeled Mobile Robot Using MPC .............................................................................241
   Muhammad Farhan Manzoor, Qinghe Wu, and Rana Javed Masood

22-V Circuits, Sensors, and Devices
A 130 Nm Operational Amplifier: Design and Schematic Level Simulation ......................................................249
   Aleksandar Pajkanovic

Author Index .............................................................................................................................................255
